

External Traffic entering into microservice network using other APIs or Client Applications

Gateway secured using OAuth2, OpenID & KeyCloak

GATEWAY

API Gateway or Edge Server built using Spring Cloud Gateway

EUREKA

Spring Cloud Eureka Server will act as a service discovery & registration agent

LOANS

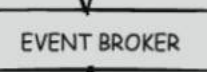

ACCOUNTS

CARDS

REST APIs built using Spring Boot, Open API documentation, validations etc

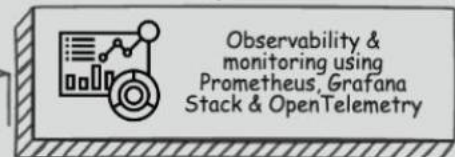

Async communication using Kafka & RabbitMQ

EVENT BROKER

MESSAGE

Observability & monitoring using Prometheus, Grafana Stack & OpenTelemetry

Sync Communication

Async Communication

Metrics, logs scraping

STANDARDS/PROJECTS USED

15-Factor methodology
Spring Boot
Spring Cloud
Spring Security
Spring Cloud Functions
Spring Cloud Stream
RESILIENCE4J
Docker
Kubernetes
OAuth2
OpenID Connect
KeyCloak
Grafana Stack
Helm

Kubernetes Cluster
