

YUVRAJSINH CHAUHAN

Ahmedabad, Gujarat, India | +91 97730 77653 | yuvichauhan3112005@gmail.com | [LinkedIn](#) | [Portfolio](#)

EDUCATION

Gandhinagar Institute of Technology, Gandhinagar University — Ahmedabad, India

2023 – 2027 (Expected)

Bachelor of Technology (B.Tech), Computer Engineering | CGPA: 9.3 / 10

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, C++, C

Backend & Design: Spring Boot, Spring Cloud, REST APIs, Microservices, Node.js, Express.js

Frontend: React, Next.js

Distributed Systems: Apache Kafka, Eureka Service Discovery, Event-Driven Architecture

Databases: MySQL, MongoDB, SQL

Cloud & DevOps: Docker, Kubernetes, Linux

Security: JWT, OAuth2

Tools & Observability: Git, Postman, Grafana, Loki

Core CS: Data Structures & Algorithms, Object-Oriented Design, Operating Systems, DBMS, Design Patterns

EXPERIENCE

Java Developer Intern — Keyanna Technology Private Limited

Jun 2026 – Jul 2026

- Traced and debugged the end-to-end request lifecycle of a Ticket Management microservice — CRUD operations, REST endpoints, database interactions, and service integration — within a Spring Boot microservices platform supporting an enterprise digital wallet product.
- Verified REST API correctness against defined request/response contracts by designing and executing Postman test suites for the Ticket Management microservice.
- Collaborated with senior developers in an Agile workflow, breaking down SRS-based requirements into discrete engineering tasks for sprint planning.

Backend Developer — Cultural & Technical Fest, Gandhinagar University

Jan 2025 – Apr 2025

- Designed and shipped a full-stack registration platform (React front-end, Node.js/Express backend) with OTP-based authentication on a relational database, supporting institute-wide event operations.
- Operated the platform in a live production environment, serving real users across registration and authentication workflows for the full duration of the event.

PROJECTS

Cloud-Native Microservices Backend System | Java, Spring Boot, Kafka, Kubernetes, Docker

- Applied Dependency Injection and Service Discovery patterns to design independently deployable microservices using Spring Boot, Eureka, and Spring Cloud Config, enabling decentralized service registration and configuration management.
- Built asynchronous, event-driven communication between services using Kafka; secured endpoints with JWT/OAuth2; containerized the system with Docker/Kubernetes and monitored it via Grafana/Loki.

TaskPilot — Agentic AI Task Management System | Python, n8n, Ollama, Qwen3, MySQL

- Designed a local agentic task-management system that separates LLM-based reasoning from controlled database execution, routing all operations through defined tool workflows to prevent arbitrary SQL generation.
- Implemented multi-step agent execution where outputs from prior operations feed into subsequent steps, validating each workflow individually before integrating an end-to-end natural-language-to-database pipeline.

Smart Travel Itinerary Builder | Next.js, React, REST APIs, SQL

- Built and demonstrated a full-stack travel itinerary platform during an intensive 24-hour hackathon sprint, from initial design through working demo.
- Developed backend REST APIs and structured SQL database integration workflows, validated via Postman.

InternMatchAI | Python, Machine Learning, NLP

- Built an NLP-based recommendation system that matches student profiles to relevant internship opportunities by extracting and comparing profile and listing features.

ACHIEVEMENTS & LEADERSHIP

- Team Lead, Smart India Hackathon (2024, 2025) — directed multidisciplinary teams through architecture planning and prototype development under national hackathon timelines; both projects cleared internal evaluation and advanced to the external round.
- Odoo Hackathon 2025 Finalist — Top 300 of 19,000+ participating teams.
- Programming in Java — Gold + Elite Certification, IIT Kharagpur.
- Nominee, Student of the Year 2026 | Nominee, Dewang Mehta IT Award for Academic Excellence.
